

2017 BSCES Section and Employer Recognition Award Nominations

2016-2017 BSCES Awards Committee Chair Topher Smith is pleased to announce that his committee received the following nominations for 2017 BSCES Section and Employee Recognition Awards, which are now being put forth for a 2016-2017 BSCES Board of Government vote.

Section Awards

AWARD	NOMINEE
Citizen Engineer Award	<ul style="list-style-type: none"> ▪ Carlos Peña, PE, CLE Engineering ▪ Peter Shanahan, PE, PhD, HydroAnalysis, Inc.
Lester Gaynor Award	none
Government Civil Engineer Award	<ul style="list-style-type: none"> ▪ Richard Bessom, PE, Massachusetts Port Authority ▪ Linda Hager, PE, Massachusetts Bay Transportation Authority
Clemens Herschel Award	<ul style="list-style-type: none"> ▪ "Urban Scale Mapping of Concrete Degradation from Projected Climate Change" by Professor Matthew Eckelman and Mithun Saha, Northeastern University
Ralph Horne Award	<ul style="list-style-type: none"> ▪ Paul Tyrell, PE, PLS, STV Incorporated
Journalism Award	<ul style="list-style-type: none"> ▪ Frank Griggs for articles in <i>Structures Magazine</i> ▪ William Lyons, Jr. PE, Esq., Fort Hill Infrastructure for articles in <i>Banker & Trademan</i> ▪ Neil Swidey, The Boston Globe, for his novel "Trapped Under the Sea"
Pre-College Educator Award	<ul style="list-style-type: none"> ▪ Michael Coughlin, Dr. Albert F. Argenziano School at Lincoln Park, Somerville, MA
Technical Group Award	none
Younger Member Award	<ul style="list-style-type: none"> ▪ Jessica Wala, PE, Nitsch Engineering

Employer Recognition Awards

AWARD	NOMINEE
Large Employer Recognition Award	<ul style="list-style-type: none"> ▪ Skanska USA Civil
Small Employer Recognition Award	<ul style="list-style-type: none"> ▪ Perry Associates, LLC

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

**BSCES Awards Committee, Boston Society of Civil Engineers Section/ASCE,
The Engineering Center, One Walnut Street, Boston, MA 02108-3616**

The Nominations Deadline is **Monday, May 15, 2017**. The Awards Committee will review all nominations and present a list of candidates for selection by the Board of Government at their May meeting. Awards will be presented at the 169th BSCES Annual Awards Dinner in the fall.

I would like to nominate Carlos G. Peña, P.E.

CITIZEN ENGINEER AWARD: This award is presented to a BSCES member or registered professional engineer for outstanding public involvement in local or national legislation, education (at any level), non-profit volunteer organizations, community activities, or similar activities improving the image of ASCE, BSCES and the civil engineering profession.

LESTER GAYNOR AWARD: This award is presented to a BSCES member or registered professional engineer for part-time elected or appointed service as a city or town official, whose reimbursement for this service has not been more than an honorarium.

GOVERNMENT CIVIL ENGINEER AWARD: This award is presented to a BSCES member who is serving as a paid public sector engineer at a federal, state, or municipal agency, department, or authority in Massachusetts.

CLEMENS HERSCHEL AWARD: This award recognizes those individuals who have published papers, not necessarily published in the BSCES Journal, that have been useful, commendable, and worthy of grateful acknowledgment. If nominating for the Clemens Herschel Award, please attach the name of the paper and names of all authors, if co-authored.

RALPH HORNE AWARD: This award is presented to a BSCES member or registered professional engineer for unpaid public service in a municipal, state or federal-elected or appointed post for philanthropic activities in the public interest.

JOURNALISM AWARD: This award is to be presented to a member of the media who reports on engineering topics, particularly civil engineering, in a manner that benefits the profession. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

PRE-COLLEGE EDUCATOR AWARD: This award is to be presented to a member of the K-12 educational community who integrates engineering topics, particularly civil engineering, in a manner that benefits the profession and may promote students to pursue an engineering career. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

TECHNICAL GROUP AWARD: This award is given for papers which have been presented at a Technical Group meeting or for papers that were submitted to a Technical Group for review and recommended for publication by its Executive Committee. Each paper should be original (i.e., not contributed or published elsewhere). This award is open to all BSCES members.

YOUNGER MEMBER AWARD: This award is intended to recognize a member, 35 years of age or younger on February 1 in the year of the award, who has made an outstanding contribution to BSCES.

Name and Company Address of Nominee(s)*:

Carlos G. Peña, P.E., CLE Engineering, 15 Creek Rd, Marion, MA 02738

Is this a re-nomination? Yes No

**Please attach a brief (no more than one page) explanation of the candidate's qualifications for nomination.*

Your Name Paul Moyer Daytime Telephone: 781-355-7100 Email: pmoyer@gill-eng.com

NOTE: *If you nominated someone last year who was not selected, you may re-nominate the individual(s).*

QUESTIONS: *Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.*

Boston, MA 02108-3616

Re: Nomination for BSCES Citizen Engineer Award
Carlos G. Peña, P.E., M. ASCE, M. BSCES, Past President

I am pleased to nominate Carlos G. Peña, P.E. for the BSCES Citizen Engineer Award. As Chair of the BSCES Past Presidents Committee, Carlos G. Peña, P.E. has been one of the key drivers behind the newly-created BSCES Infrastructure Day. Originally conceived by the Past Presidents Committee in 2014, Infrastructure Day is an annual celebration with the objective increasing public appreciation of notable infrastructure in Massachusetts communities.

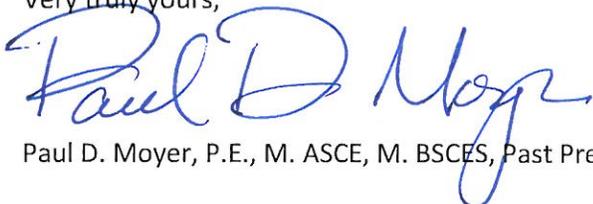

The first Infrastructure Day was held on May 15, 2015 for the Choate Bridge (circa 1764) in Ipswich, MA to celebrate the oldest two-span stone arch bridge in the country and was designated a National Historic Civil Engineering Landmark by ASCE. The second Infrastructure Day was held on May 14, 2016 at Heritage State Park in Holyoke, MA to celebrate the Holyoke Dam and Canal system and its contribution to the development of the city as an industrial leader in 1800's and as a green community today that derives 100% of its electricity solely from a dam-generated power plant. No Infrastructure Day has been held yet this year - despite the herculean efforts of Carlos and the Past Presidents Committee, plans for a May event in South Boston fell through due to a shortage of time and lack of community participation.

The first two events were fantastic successes, thanks to the tireless efforts of Carlos, along with the Past Presidents Committee, most notably Reed Brockman, P.E. and David Westerling, P.E., P.L.S. As Chair of the Past President's Committee, Carlos was the planner – identifying, organizing and tracking the many tasks, meetings, outreach efforts and other activities that had to take place to pull everything together.

Carlos is a Vice President and Principal at CLE Engineering, a premier full-service engineering firm, with specialties in civil and marine engineering. With nearly three decades of experience, Carlos has been involved in over 250 projects as a consulting and construction engineer. As their Vice President, Carlos manages business development and client relations. He also oversees updates to quality control procedures, standardization of design and procedures, and professional standards. Carlos has a B.S. in Civil Engineering from the University of Massachusetts, Amherst, MA, and is a registered Professional Engineer in four states, Carlos was the President of BSCES in 2002.

Carlos' leadership certainly demonstrates outstanding public involvement in local community activities that improve the image of ASCE, BSCES and the civil engineering profession. Thank you for your consideration of this nomination.

Very truly yours,

Paul D. Moyer, P.E., M. ASCE, M. BSCES, Past President

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

**BSCES Awards Committee, Boston Society of Civil Engineers Section/ASCE,
The Engineering Center, One Walnut Street, Boston, MA 02108-3616**

The Nominations Deadline is **Monday, May 15, 2017**. The Awards Committee will review all nominations and present a list of candidates for selection by the Board of Government at their May meeting. Awards will be presented at the 169th BSCES Annual Awards Dinner in the fall.

I would like to nominate Peter Shanahan, P.E., Ph.D. For the:

CITIZEN ENGINEER AWARD: This award is presented to a BSCES member or registered professional engineer for outstanding public involvement in local or national legislation, education (at any level), non-profit volunteer organizations, community activities, or similar activities improving the image of ASCE, BSCES and the civil engineering profession.

LESTER GAYNOR AWARD: This award is presented to a BSCES member or registered professional engineer for part-time elected or appointed service as a city or town official, whose reimbursement for this service has not been more than an honorarium.

GOVERNMENT CIVIL ENGINEER AWARD: This award is presented to a BSCES member who is serving as a paid public sector engineer at a federal, state, or municipal agency, department, or authority in Massachusetts.

CLEMENS HERSCHEL AWARD: This award recognizes those individuals who have published papers, not necessarily published in the BSCES Journal, that have been useful, commendable, and worthy of grateful acknowledgment. If nominating for the Clemens Herschel Award, please attach the name of the paper and names of all authors, if co-authored.

RALPH HORNE AWARD: This award is presented to a BSCES member or registered professional engineer for unpaid public service in a municipal, state or federal-elected or appointed post for philanthropic activities in the public interest.

JOURNALISM AWARD: This award is to be presented to a member of the media who reports on engineering topics, particularly civil engineering, in a manner that benefits the profession. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

PRE-COLLEGE EDUCATOR AWARD: This award is to be presented to a member of the K-12 educational community who integrates engineering topics, particularly civil engineering, in a manner that benefits the profession and may promote students to pursue an engineering career. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

TECHNICAL GROUP AWARD: This award is given for papers which have been presented at a Technical Group meeting or for papers that were submitted to a Technical Group for review and recommended for publication by its Executive Committee. Each paper should be original (i.e., not contributed or published elsewhere). This award is open to all BSCES members.

YOUNGER MEMBER AWARD: This award is intended to recognize a member, 35 years of age or younger on February 1 in the year of the award, who has made an outstanding contribution to BSCES.

QUESTIONS: *Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.*

Nomination of Peter Shanahan as 2017 BSCES Citizen Engineer Award

This letter is provided in support of the nomination of Dr. Peter Shanahan, P.E., Ph.D. for the 2017 BSCES Citizen Engineer Award. Dr. Shanahan represents the personification of the Citizen Engineer, serving in multiple capacities within the profession, academia, his community, and as an advocate for the environment. Pete has been an involved participant in numerous professional organizations and technical committees. He has served as the chair of the ASCE Committee on Hydrologic Transport and Dispersion, as a member of the Committee on Research of the Water Environment Federation, on the Editorial Board of the Journal of Groundwater, and on the Task Group on River Water Quality Modeling of the International Association on Water Quality. He has also served over an extended period as member of the BSCES Freeman Committee.

In addition to a demanding career as a consulting engineer, Dr. Shanahan has had a strong commitment to the education of the next generation of engineers. For a period of more than 20 years, Dr. Shanahan has contributed to MIT's Master of Engineering program, teaching classes in water and wastewater treatment, waste containment and remediation, chemical fate and transport, and the senior capstone project. Two of Dr. Shanahan's colleagues at MIT have provided additional letters of support for this nomination. Dr. Eric Adams notes that while working part-time, Dr. Shanahan's teaching load was double that of the average faculty member and describes his willingness to help students in finding satisfying careers. Dr. David Marks extols Dr. Shanahan's ability to communicate to both a technical and non-technical audience, speaking "geeks to the geeks and clear common sense to the greater community concerned about the impact of engineering projects." He notes that there are hundreds of students from the US and abroad that have "benefited from his insights, guidance and mentoring."

Dr. Shanahan served seven years on the Conservation Commission in his community of Acton, Massachusetts. The Conservation Commission is a Massachusetts institution in which volunteers with and without particular technical expertise ensure that the state's wetland protection laws are appropriately enforced. Dr. Shanahan has also served on the Board of Directors of OARS, Inc., for a period of ten years and president of the organization from 2013 through 2015. OARS' mission is described as being to "protect, preserve and enhance the natural and recreational features of the Assabet, Sudbury and Concord Rivers." OARS' executive director, Ms. Field-Juma, notes his invaluable contributions to OARS in a letter in support of this nomination. She also highlights his specific technical contributions to reviews of a river restoration modeling study, a USGS nutrient study, and the development and maintenance of the organization's water quality monitoring program. Dr. Shanahan she notes "can be relied upon to be the level head in the room" in discussions of organization policies and actions.

May 11, 2017

To: Christopher Smith, BSCES Awards Committee
Re: Letter of support for Pete Shanahan

I am writing to enthusiastically support Pete Shanahan for a BSCES Citizen Engineer Award. Pete got his PhD from MIT in 1981, after doing undergrad and masters degree work at Northeastern, MIT, and Stanford. Sandwiched around degrees he worked for Bechtel, CDM and what was then ERT (now AECOM) before starting a successful hydrology consulting firm (Hydroanalysis). Then in the mid-1990s he joined MIT's Dept. of Civil and Environmental Engineering to teach part time.

He was a tremendous help to both our Master of Engineering and our undergraduate programs, teaching at one time or another classes on water and wastewater treatment, waste containment and remediation, chemical fate and transport in the environment, the senior capstone subject and the Master of Engineering team project course. Despite being part time, his teaching load was approximately double that of the average faculty member, and his teaching evaluations were consistently above those of the faculty. His teaching was rigorous, but practical, and included topics (or even whole subjects) that most faculty did not want to (or could not) teach. In addition, he almost single-handedly conducted our department's ABET review for a couple of cycles. And, because of his extensive network of contacts, he was the go-to person to help undergraduate and graduate students find jobs.

Pete began working at MIT because he enjoyed teaching and working with young engineers. His consulting business was well-established, so he could afford to take the significant cut in pay, but he worked far harder and longer than other part-timers who simply want to teach an occasional class. He also taught because he wanted to give back to the institution that helped launch his career.

Last year he retired from MIT, though he still works part time as a consultant. He was a real gem and our department will never be the same without him.

Sincerely,

E. Eric Adams
Director,
MIT Dept. of Civil and Environmental Engineering
Master of Engineering Program 1998-2015

NOMINATION FOR PETER SHANAHAN FOR THE BSCES CITIZEN ENGINEER AWARD

Prepared by David Marks, Goulder Professor Emeritus of Civil and Environmental Engineering, MIT May 11,2017

I am pleased to recommend Peter Shanahan for this important award. He is truly an engineering citizen bringing his wealth of knowledge to education, mentoring, and community service. I first knew him as an undergraduate at MIT in the 70's and followed his career closely. He worked in a consulting organization after graduation that I was associated with so I really got to know him as a professional as well as a student. He has wide knowledge, excellent work skills and a good sense for problem solving. He easily interacts with a wide spectrum of society and can talk geek to the geeks and clear common sense to the greater community concerned about the impact of engineering projects.

He returned to MIT later in his career to obtain the PhD with Professor Donald Harlemen, world-renowned water quality management specialist, before returning to the consulting world. He runs a very small operation that has great impact in the decisions about project development and is noted for his skills in fairly laying out the pluses and minuses of alternatives in clear understandable language and graphics. When we started the new Masters of Engineering Program at MIT we were faced with a problem. The degree was to be practice oriented at a place that was very research oriented. We wanted the MENG to give breath to bright students not only in engineering and management techniques but to give them a sense and grounding in professional rather than academic life. We turned to Pete to help us out and he had a long career in helping students become poised and directed professionals in Civil and Environmental Engineering. There are literally hundreds of students from all over the world who have benefits from his insights, guidance and mentoring. All this time he maintained his consulting operation with great success.

I am so pleased to recommend him for this reward. I think he has all the qualifications that would make him a great recipient. Contact me at dhmarks@mit.edu with any questions or comments.

Re: Nomination for Citizen Engineer Award

Richard Tardiff
Treasurer
Natick

Dear Mr. Smith,

Dick Lawrence
Clerk
Hudson

It gives me great pleasure to support the nomination of Peter Shanahan for the Citizen Engineer Award of BSCES. Pete joined the Board of Directors of OARS, the non-profit watershed organization for the Assabet, Sudbury and Concord Rivers, in 2006. As a science-based advocacy group working to restore the water quality and flow in our three-river system, Pete's knowledge of hydrology and environmental science and engineering, and the practical aspects of getting things done, has been invaluable. On top of that, he is a wonderful person to work with—funny, kind, always considerate and thoughtful, always generous with his time. While it takes all types to make a Board work, Pete embodies the best attributes, always keeping the best interests of the organization in mind while be a consummate professional. Pete served as President from 2013-2015, a significant time commitment. He even served on the Development Committee when no-one else would—although that is pretty far afield of his wheelhouse.

Don Burn
Westborough

Robert Donelan
Concord

Lisa Eggleston
Sudbury

Allan Fierce
Stow

Our organization tends to lift beyond its apparent weight when it comes to participating in and evaluating scientific studies, commenting on pollution control permits, and weighing in on proposed policies and regulations. We have the credibility and ability to do so because we have people like Pete on the Board. Pete represented OARS on the Technical Advisory Committee of a major river restoration modeling study (Army Corps of Engineers/MassDEP) and most recently in meetings on a USGS nutrient study of the river to critically evaluate the success of pollution control efforts. Our water quality monitoring program, which uses trained volunteers to provide an uninterrupted quality-controlled dataset for regulation and management by federal and state agencies and at the local level, has benefited greatly from Pete's guidance. He can be relied upon to be the level head in the room as we discuss actions that the organization must take, large and small, including decisions to appeal pollutant discharge permits. This approach has resulted in major successes in reducing wastewater pollution in our rivers, the primary cause of eutrophication. Thanks to Pete and fellow Board members, our three federally-designated Wild & Scenic rivers have made significant progress towards meeting their water quality goals of Class B, "fishable and swimmable."

In short, I can think of no-one in the engineering field that I would rather commend for demonstrating "outstanding public involvement" than Pete Shanahan. The proof is in our rivers.

Peter Shanahan

Alison Field-Juma, Executive Director

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

**BSCES Awards Committee, Boston Society of Civil Engineers Section/ASCE,
The Engineering Center, One Walnut Street, Boston, MA 02108-3616**

The Nominations Deadline is **Monday, May 15, 2017**. The Awards Committee will review all nominations and present a list of candidates for selection by the Board of Government at their May meeting. Awards will be presented at the 169th BSCES Annual Awards Dinner in the fall.

I would like to nominate Richard M. Bessom For the:

CITIZEN ENGINEER AWARD: This award is presented to a BSCES member or registered professional engineer for outstanding public involvement in local or national legislation, education (at any level), non-profit volunteer organizations, community activities, or similar activities improving the image of ASCE, BSCES and the civil engineering profession.

LESTER GAYNOR AWARD: This award is presented to a BSCES member or registered professional engineer for part-time elected or appointed service as a city or town official, whose reimbursement for this service has not been more than an honorarium.

GOVERNMENT CIVIL ENGINEER AWARD: This award is presented to a BSCES member who is serving as a paid public sector engineer at a federal, state, or municipal agency, department, or authority in Massachusetts.

CLEMENS HERSCHEL AWARD: This award recognizes those individuals who have published papers, not necessarily published in the BSCES Journal, that have been useful, commendable, and worthy of grateful acknowledgment. If nominating for the Clemens Herschel Award, please attach the name of the paper and names of all authors, if co-authored.

RALPH HORNE AWARD: This award is presented to a BSCES member or registered professional engineer for unpaid public service in a municipal, state or federal-elected or appointed post for philanthropic activities in the public interest.

JOURNALISM AWARD: This award is to be presented to a member of the media who reports on engineering topics, particularly civil engineering, in a manner that benefits the profession. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

PRE-COLLEGE EDUCATOR AWARD: This award is to be presented to a member of the K-12 educational community who integrates engineering topics, particularly civil engineering, in a manner that benefits the profession and may promote students to pursue an engineering career. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

TECHNICAL GROUP AWARD: This award is given for papers which have been presented at a Technical Group meeting or for papers that were submitted to a Technical Group for review and recommended for publication by its Executive Committee. Each paper should be original (i.e., not contributed or published elsewhere). This award is open to all BSCES members.

YOUNGER MEMBER AWARD: This award is intended to recognize a member, 35 years of age or younger on February 1 in the year of the award, who has made an outstanding contribution to BSCES.

Name and Company Address of Nominee(s)*:

Massachusetts Port Authority (Massport)

Nomination of Richard M. Bessom, P.E., CCM for BSCES Government Civil Engineer Award

Rick Bessom is Massport's most senior Program Manager for Horizontal Projects within the Capital Programs and Environmental Affairs department. He has worked as a Civil Engineer at Massport for more than 31 years and oversees a variety of airside, waterside and landside projects that include runway construction, fuel supply, FAA navigation aids, roadways, bridges, tunnels, drainage, parking structures, maritime projects, pier rehabilitation, utility relocation, and other projects necessary to keep the airport operational and in a state of good repair during the current period of burgeoning airport passenger service. His jurisdiction extends not only to Logan Airport, but to Worcester Airport, Hanscom Field, Conley Terminal, Moran Terminal, the World Trade Center, and other Massport properties in South Boston, East Boston and Chelsea. Rick also oversees the Massport in-house Survey unit.

Notable projects Rick successfully managed include: Boston-Logan's newest runway, Runway 14-32, numerous runway and taxiway pavement rehabilitation projects, the elevated moving walkways between the Central Garage and Terminals B and C, a new airfield lighting vault, and the new underground jet fuel distribution system and centralized fuel storage facility.

Rick is well-known for his attention to detail and unprecedented knowledge of engineering design and construction. During his career at Massport he has gained extensive knowledge of airport and airfield operational requirements and has imparted this knowledge to many engineers that have worked under his direction.

As a part of his duties as program manager, he is responsible for planning and budgeting for new projects that enhance the customer experience with Massport and also ensures that ongoing repairs are made to existing airport properties that will prolong their use. With thorough recordkeeping for past projects he is able to anticipate repairs that will be necessary based on the age of prior construction and budget accordingly.

Rick obtained a BS in Civil and Environmental Engineering from the University of Rhode Island.

2017 Individual Section Awards

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

2017 BSCES Individual Section Awards

Nomination of Linda Hager, P.E.

for the Government Civil Engineer Award

Linda is an active member in ASCE and BSCES. She is a Past President of BSCES and presently serves as an ASCE Region 1 Governor from BSCES. She is a licensed Professional Engineer in Massachusetts and has over 30 years of civil engineering experience. She presently serves as a paid public sector engineer for the Massachusetts Bay Transportation Authority (MBTA) and oversees consultant and contractor projects in the Bridge Group.

I have known Linda since she began with the MBTA and worked with her on a few projects. She has managed a variety of Rehabilitation and State of Good Repair projects for the MBTA. This includes, but is not limited to, Rehabilitation of the Franklin Line over Guild Street in Norwood, Rehabilitation of the Franklin Line over East Street in Westwood, Replacement of the Route 16 Bridge over the Orange Line (for the Woods Memorial Bridge project), Restoration of the Alewife Garage, One Canal at North Station, and Rehabilitation of the South Shore Garages.

Linda has been involved with all phases of engineering for public and private sector projects since the beginning of her engineering career. Her professional experience includes a well-rounded variety of multi-discipline projects in sectors such as transportation, education, industrial, recreation, and retail. She has been a member of ASCE since college and joined BSCES when she moved to Massachusetts in the early 1990s. Below is a summary of her involvement within ASCE, BSCES, and other local organizations.

BSCES

Board

- President, 7/2007 – 6/2008
- President-Elect, 7/2006 – 6/2007
- Senior Vice President, 7/2004 – 6/2006
- Vice President, 7/2003 – 6/2004
- Secretary, 7/2002 – 6/2003
- Structural Technical Group Chair, 7/2001 – 6/2002

Committees

- T&DI, 2007 - present
- Newsletter Editorial Committee, 2002 - 2004 & 2007 - 2014
- Infrastructure Technical Group, 1993 - 2008
- Structural Technical Group, now SEI, 1994 - 2005

ASCE

- Region 1 Governor, 2013 – present
- SEI Member
- T&DI Member
- President, ASCE Student Chapter – University of Connecticut, 1983-1984

OTHER VOLUNTEER ACTIVITIES

Re: Nomination of M. Eckelman and M. Saha for the 2017 BSCES Clemens Herschel Award

We are pleased to nominate Prof. Matthew Eckelman and his former graduate student Mithun Saha for the 2017 BSCES Clemens Herschel Award for the paper entitled “Urban Scale Mapping of Concrete Degradation from Projected Climate Change,” published in *Urban Climate* in 2014. The study is about assessing the vulnerability of reinforced concrete buildings to projected changes in climate in and around Boston. The study looks specifically at vulnerability to corrosion following carbonation and/or chloride ingress through the concrete cover.

The paper finds that for reinforced concrete buildings constructed today, the projected rises in carbon dioxide and resulting mean temperature increases will reduce the time to corrosion initiation by up to 26 years compared to today's climatic conditions. The authors then used Boston as a testbed to examine the vulnerability of the reinforced concrete building stock in the region, based on date of construction, to estimate when corrosion initiation due to carbonation and/or chlorination would occur, given past and projected future climate and assuming no protective measures. This type of information is useful for monitoring and mitigation purposes. The paper also identifies protective solutions, some of which are starting to see more widespread practice, such as using epoxy-coated reinforcement.

The study has since been useful nationally and internationally in that it shows the importance of considering future, not just current, climatic conditions in setting code recommendations. The work fits with studies conducted for other regions, whose authors, along with Prof. Eckelman, are now part of Subcommittee 130H of the American Concrete Institute (ACI) on climate change impacts on concrete. The subcommittee is working on documents and recommendations for the wider civil engineering community on these important topics. The nominated paper thus identifies the significant implications for the reinforced concrete building stock in this region and worldwide. This work with ACI exemplifies the importance of the type of outstanding research being conducted more broadly by Prof. Eckelman, who has established himself as a top young researcher internationally in industrial ecology, life cycle assessment, and impact of climate change on infrastructure and the environment. This paper is an outstanding candidate for this award.

*Department of Civil and
Environmental Engineering*

f 617-373-4419

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

**BSCES Awards Committee, Boston Society of Civil Engineers Section/ASCE,
The Engineering Center, One Walnut Street, Boston, MA 02108-3616**

The Nominations Deadline is **Monday, May 15, 2017**. The Awards Committee will review all nominations and present a list of candidates for selection by the Board of Government at their May meeting. Awards will be presented at the 169th BSCES Annual Awards Dinner in the fall.

I would like to nominate Paul J. Tyrell, PE, PLS For the:

CITIZEN ENGINEER AWARD: This award is presented to a BSCES member or registered professional engineer for outstanding public involvement in local or national legislation, education (at any level), non-profit volunteer organizations, community activities, or similar activities improving the image of ASCE, BSCES and the civil engineering profession.

LESTER GAYNOR AWARD: This award is presented to a BSCES member or registered professional engineer for part-time elected or appointed service as a city or town official, whose reimbursement for this service has not been more than an honorarium.

GOVERNMENT CIVIL ENGINEER AWARD: This award is presented to a BSCES member who is serving as a paid public sector engineer at a federal, state, or municipal agency, department, or authority in Massachusetts.

CLEMENS HERSCHEL AWARD: This award recognizes those individuals who have published papers, not necessarily published in the BSCES Journal, that have been useful, commendable, and worthy of grateful acknowledgment. If nominating for the Clemens Herschel Award, please attach the name of the paper and names of all authors, if co-authored.

X

RALPH HORNE AWARD: This award is presented to a BSCES member or registered professional engineer for unpaid public service in a municipal, state or federal-elected or appointed post for philanthropic activities in the public interest.

JOURNALISM AWARD: This award is to be presented to a member of the media who reports on engineering topics, particularly civil engineering, in a manner that benefits the profession. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

PRE-COLLEGE EDUCATOR AWARD: This award is to be presented to a member of the K-12 educational community who integrates engineering topics, particularly civil engineering, in a manner that benefits the profession and may promote students to pursue an engineering career. The Public Awareness and Outreach Committee reviews these nominations and recommends the recipient to the Board.

TECHNICAL GROUP AWARD: This award is given for papers which have been presented at a Technical Group meeting or for papers that were submitted to a Technical Group for review and recommended for publication by its Executive Committee. Each paper should be original (i.e., not contributed or published elsewhere). This award is open to all BSCES members.

YOUNGER MEMBER AWARD: This award is intended to recognize a member, 35 years of age or younger on February 1 in the year of the award, who has made an outstanding contribution to BSCES.

Name and Company Address of Nominee(s)*:

Paul Tyrell, PE

STV Incorporated

One Financial Center, Boston, MA 02111

Is this a re-nomination? Yes No

***Please attach a brief (no more than one page) explanation of the candidate's qualifications for nomination.**

Your Name: Mark W. Pelletier, PE Daytime Telephone: 617-303-1113 Email: mark.pelletier@stvinc.com

NOTE: *If you nominated someone last year who was not selected, you may re-nominate the individual(s).*

QUESTIONS: *Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.*

Paul J. Tyrell, PE, PLS

Paul J. Tyrell, PE, PLS, is chief civil engineer & senior associate at STV Incorporated. He is being nominated for the 2017 BSCES Ralph Horne Award for his years of service as a member of the Massachusetts Board of Registration of Professional Engineers and of Land Surveyors.

As its name suggests, this Board establishes, monitors and enforces qualifying standards for the engineering and land surveying professions. The Board works to insure that persons practicing in these professions are competent to practice and are not endangering the life, health, safety and welfare of the public.

Paul, who is licensed as both a Professional Engineer and Professional Land Surveyor in Massachusetts, was appointed to serve on the Board of Registration by former Governor Deval Patrick in October 2011 and re-appointed by Governor Charley Baker in January 2017. He became the Board's chair. During his five plus years of service as a member of the Board, he has work diligently in support of the Board's intended purpose of insuring professional competency and protecting the public interest. A past member of BSCES and the Massachusetts Association of Land Surveyors and Civil Engineers, Paul strives to keep members of both organizations apprised of the Board's activities. Toward this end, Paul met with the BSCES Board of Government and spoke at the 2017 MALSCE Convention. An active member of the National Council of Examiners for Engineering and Surveying® (NCEES) Paul has served on a number NCEES Committees and task force's and was recently elected Vice President of the Councils Northeast Zone representing the zones 20 member boards on NCEES Board of Directors. Paul was the featured presenter at the October 2016 BSCES Younger Member Group NCEES Information Session.

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

With equal parts expertise and personal passion, Frank Griggs has built a distinguished career researching, documenting and promoting the history of the civil engineering profession. A longtime member of ASCE's History & Heritage Committee, Frank is a prolific and award-winning writer and presenter on civil engineering historical landmarks and the lives of noteworthy engineers. A professional engineer and ASCE Distinguished Member, Frank has held notable academic appointments at Merrimack College and Union College, including CE department chair, vice president for academic affairs, and dean. Following his academic career, Frank spent seven years in private practice, specializing in historic bridges and quality assurance.

Re: Nomination of William F. Lyons, Jr., PE, Esq. for 2017 Journalism Award

Dear Mr. Smith:

I would like to nominate Bill Lyons for the above-referenced award. While Bill is not a full-time member of the media, Bill publishes a regular column in the *Banker & Tradesman* that focuses on the topics of transportation, infrastructure, and urban planning. Among his many other responsibilities to his company, the civil engineering industry, and his military service, Bill is prolific writer and has authored numerous articles on complex and important topics facing transportation and other forms of infrastructure. Bill's recent *Banker & Trademan* articles include:

1. Lessons Not Learned, Privatization of Transport Has Led To Unregulated Chaos, Conditions Approach Tipping Point On Boston's Street and Rails, March 27, 2017;
2. From Drones To Digits, The Future of Mobility and Big Data, Information and The City of the Future, February 26, 2017;
3. Change Is On Its Way, State Decides To Regulate Ride Share Companies, Fingerprinting Requirements Not Included in Last Year's Regs, But May Still Come to Pass, January 1, 2017;
4. Dimming Prospects, Is Ridesharing Economically and Socially Sustainable? Trouble Ahead For Ridesharing Firms As Self-Driving Cars Come Online, October 30, 2017;
5. Make Way For The Future, Transportation and Technology On A Collision Course, Autonomous Vehicles Generate Interest In Land Use, Public Safety, July 14, 2016;
6. What's Old Is New Again, Public-Private Partnerships Are Back On The Agenda, Alternative Project Delivery Picks Up Speed, June 26, 2016;
7. Sit Down and Buckle In, Amtrak Is Better Than Flying, Passenger Rail in the Northeast Corridor Is Exceptional, April 24, 2016;

May 8, 2017

Letter to Topher Smith, P.E.

Page 2

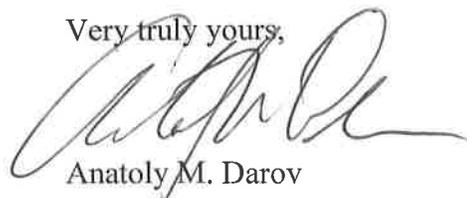

8. Creating Ripples, Water Resources Legislation Takes One Step Closer to Law, Bill Would Allow Public-Private Partnerships To Address Underfunded Infrastructure, March 27, 2016;
9. How Much Fare Is Fair? Debate Over MBTA Fares Redux, Preserving Equity While Preserving The System, February 28, 2016;
10. A New Way Forward, Getting The Green Line Back On Track, Reimagining The Green Line Extension, January 24, 2016;
11. On The Fast Track, Congress Moves Forward With Transportation Funding, Legislation Includes Significant Increase In Funding For MassDot, December 27, 2015;
12. The End of An Era, Riding Off Into The Sunset, Davis Says Goodbye After More Than 20 Years With The MBTA, November 8, 2015;
13. Safety Before Convenience, Moving Forward With Hands-Free, Distracted Driving Hits a Bump In the Road, October 18, 2015;
14. Driving Into The Future, Autonomous Vehicles Are Here, The Transportation Theory Of Everything, September 27, 2015;
15. Transportation Benefits On the Menu, A New Hub Of Urban Life, Transportation Benefits On the Menu, August 30, 2015;
16. Charting Their Own Course, Local Control Over Local Needs, Local Option Transportation Taxes Put Municipalities At the Wheel, July 27, 2015;
17. Reaching For Compromise On the Rails, Equity Versus Financial Solvency: How Much Fare Is Fair? Debate Over MBTA Fares Continues, June 15, 2015;
18. Fixing the MBTA, More Reform and More Revenue, A Transit Agency At a Crossroads, May 11, 2015;
19. Walk This Way, Urbanism Moves Into High Gear, New Research Demonstrates Higher Values For Walkable Places, March 22, 2015;
20. A New Approach, Wanted: Dynamic Leader To Drive Change At the MBTA, Lack of Leadership Leads To Poor Performance, March 1, 2015;
21. Climate Change and Infrastructure: Riding the Rising Tide With Resiliency, January 19, 2015;

May 8, 2017
Letter to Topher Smith, P.E.
Page 3

22. Back To Square One, After Repeal, A New Approach To Gas Tax, Funding For Transit Circles Back to the Legislature and A New Governor, November 23, 2014;
23. A Cautionary Tale, Once Upon A Time, The Olympics Came To Boston, How Infrastructure Drove the Train, October 12, 2014;
24. Driving Questions, The Future of Federal Transportation Funding, While Congress Debates and Delays, Infrastructure Suffers, September 21, 2014;
25. A Taxing Question, Repeal of Indexed Gas Tax Would Have Far Reaching Implications, State's Infrastructure In Need of Massive and Costly Repairs, July 6, 2014;
26. Public Transportation, A Matter of Fairness, Boston's Forthcoming Mobility Action Plan Must Be Equitable, June 1, 2014;
27. ULI Perspectives, If Mexico City Can Invest In Transportation, Why Can't We: Importing Bus Rapid Transit Service To Boston Is A No-Brainer, March 16, 2014.

In addition, Bill's work has been published in the past few years in Commonwealth magazine, Subrogator magazine, Claims magazine, Parking Today and, of course, the BSCES Newsletter. His journalism has made an important contribution to educating the business community and the general public on the importance of our infrastructure. For these efforts, I believe that Mr. Lyons is a worthy recipient of the 2017 Journalism Award.

Very truly yours,

Anatoly M. Darov

NOTE: If you nominated someone last year who was not selected, you may re-nominate the individual(s).

QUESTIONS: Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.

Per your Invitation, I would like to nominate Neil Swidey for the Journalism Award for 2017.

Though a staff member of the Boston Globe, Neil independently authored the book "Trapped Under the Sea", the story of 1990s construction of the Deer Island outfall. His comprehensive narrative is told through the eyes of engineers, contractors, politicians, and others who participated in this epic undertaking. The thrust of his story, though, is the bravery of those men who built the tunnel including, and especially, the five who died just as the tunnel was set to open.

Neil's work is both comprehensive and detailed about our work as engineers and construction contractors. Books like this don't not come around often, especially one with focus on Boston. He is clearly worthy of our Award.

For more info, see link below:

<http://www.trappedunderthesea.com/>

Tom Pawlina, PE
781,662,6033

A handwritten signature in blue ink that reads "Tom Pawlina". The signature is written in a cursive style with a long horizontal stroke extending to the right.

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

**BSCES Awards Committee, Boston Society of Civil Engineers Section/ASCE,
 The Engineering Center, One Walnut Street, Boston, MA 02108-3616**

The Nominations Deadline is **Monday, May 15, 2017**. The Awards Committee will review all nominations and present a list of candidates for selection by the Board of Government at their May meeting. Awards will be presented at the 169th BSCES Annual Awards Dinner in the fall.

I would like to nominate Michael Coughlin For the:

CITIZEN ENGINEER AWARD: This award is presented to a BSCES member or registered professional engineer for outstanding public involvement in local or national legislation, education (at any level), non-profit volunteer organizations, community activities, or similar activities improving the image of ASCE, BSCES and the civil engineering profession.

LESTER GAYNOR AWARD: This award is presented to a BSCES member or registered professional engineer for part-time elected or appointed service as a city or town official, whose reimbursement for this service has not been more than an honorarium.

GOVERNMENT CIVIL ENGINEER AWARD: This award is presented to a BSCES member who is serving as a paid public sector engineer at a federal, state, or municipal agency, department, or authority in Massachusetts.

YOUNGER MEMBER AWARD: This award is intended to recognize a member, 35 years of age or younger on February 1 in the year of the award, who has made an outstanding contribution to BSCES.

Name and Company Address of Nominee(s)*:

Michael Coughlin
Albert F. Argenziano School
290 Washington St, Somerville, MA 02143

Is this a re-nomination? Yes No

*Please attach a brief (no more than one page) explanation of the candidate's qualifications for nomination.

Your Name: Olivia Richards Daytime Telephone: 508-615-6834 Email: oliviaanne.richards@gmail.com

NOTE: If you nominated someone last year who was not selected, you may re-nominate the individual(s).

QUESTIONS: Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.

Michael Coughlin is a middle school science teacher at the Dr. Albert F. Argenziano School at Lincoln Park, a Somerville public school. Michael Coughlin signed up his middle school students for the Future City Competition a few years ago. He utilized funds received by the Massachusetts Department of Higher Education @scale grant to help cover the costs for his school to purchase materials for the competition and attend competition day. He has entered a team of middle schools to compete in the competition for 3 straight-years now. This year, after just a few years of participating, he led his team to win the New England Regional Future City Competition. It is evident that he has inspired so many young minds to become enthusiastic about engineering when you meet his students. They are eager to learn and eager to succeed. So many of his past students are still involved in the competition and attend competition day to support the team. Michael Coughlin is an exemplary teacher who is succeeding in inspiring middle school students to have a lastly excitement for science and engineering.

Each year, BSCES presents awards to deserving individuals in the Section or in the community who are nominated by their peers in recognition of their service. **Here is your opportunity to nominate a co-worker, friend, or someone who you think deserves special recognition.** To submit a nomination, complete this form and return it to:

QUESTIONS: *Contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.*

Nomination for Younger Member Award:

Jessica L. Yarmarkovich, PE, ENV SP, LEED AP ND

Project Engineer
Nitsch Engineering

After receiving her degree in Civil Engineering from Syracuse University in 2012, Jessica joined Nitsch Engineering. Jessica received her Professional Engineer Licensure in 2016, and was promoted to a Project Engineer shortly after. As a Project Engineer, she works directly with the client along with the Project Manager to design site and infrastructure improvements for a wide variety of public and private projects. These projects have included a myriad of multi-modal infrastructure improvements, and the incorporation of low impact development techniques and stormwater best management practices for sustainable sites and green infrastructure. Jessica is also a certified LEED Accredited Professional in Neighborhood Development, and an Envision Sustainable Professional of the Institute for Sustainable Infrastructure.

Jessica is an ASCE/BSCES member, joining in 2009, while still in college. She is currently a member of the BSCES Young Member Group (YMG) where she serves as the Vice Chair and incoming 2017-2018 YMG Chair. Throughout her involvement in the YMG, Jessica has served as the Student Chapter Committee Chair (2015-2016), the Secretary (2015-2016), the Social Media Coordinator (2014-2016) and the liaison to Massachusetts Institute of Technology ASCE Student Chapter (2013-2016).

Throughout her involvement in YMG, Jessica has made many contributions to YMG, BSCES, and the engineering community. She has been involved in outreach events, including Model Bridge and Future City. In January 2017, Jessica joined Reed Brockman on an episode of *Civil Engineering Today*, where she and Reed discussed the YMG, outreach to K-12 and college students, and contributing to a community of young civil engineers. Jessica regularly volunteers at events, such as Nitsch Engineering's annual Introduce a Girl to Engineering Day, as well as the United Way auction, and various 5K and 10K running events for charitable organizations. She has participated in the design and building of the company's entries into CANstruction for the past five years, and has been an integral part of Nitsch's participation in this important event to fight hunger.

Jessica has consistently attended and helped with the majority of the YMG events throughout the years, such as the annual Billiards Tournament, the annual Bocce tournament, and the annual Holiday Party. Jessica has also been instrumental in executing many events throughout her multiple roles in YMG:

- Jessica played a large part in planning and executing the 2015 Student Caucus, as Student Chapter Committee Chair. Eight Student Chapters attended the event, contributing to over 30 students;
- Jessica planned and coordinated a technical YMG event, 'History of the MWRA with Fred Laskey', which was very well attended;
- She helped coordinate the NCEES Speaker Event, hosted at Nitsch Engineering;
- Jessica assisted in the ASCE 2015 Student Transition Activity (STAY) Grant application for \$1,500, which the YMG was awarded. With this grant money, Jessica helped plan and host the first YMG Senior Night; and
- She submitted, as Vice Chair, nominations for the 2017 Eastern Regional Younger Members Conference (ERYMC), and the BSCES YMG was awarded the 2017 Outstanding Younger Member Group Project for the Holiday Meal Drive.

Jessica also attends BSCES events hosted by other technical groups, such as the Construction Institute Boston Chapter and the Environmental and Water Resources Institute, as well as other industry association events such as Environmental Business Council, Massachusetts Building Congress, and Boston Harbor Association. She is also a resident tutor at Harvard University, where she serves as an Engineering and Computer Science sophomore advisor to three to four undergraduate students a year.

Jessica's involvement in the YMG, her enthusiasm for the engineering profession, and commitment to learning make her a great candidate for the Younger Member Award.

The Boston Society of Civil Engineers Section of the American Society of Civil Engineers Awards Committee invites you to nominate an organization to receive the Small Employer Recognition Award or the Large Employer Recognition Award. Please see the following awards description and page 2 of this form for nomination instructions. To be eligible to receive this award your award nomination must be received by the BSCES Awards Committee no later than Monday, May 15, 2017.

As a means of fostering participation in Society activities, the Boston Society of Civil Engineers Section/ASCE has established an award to recognize those employers who encourage their engineers to actively participate in ASCE and BSCES. Special recognition will go to those organizations who exhibit exemplary support as evidenced by:

- Providing a model for involvement through organization-wide participation in local, regional, and national ASCE and BSCES activities.
- Allowing engineers time off to attend ASCE and BSCES meetings and seminars.
- Being sponsors of ASCE and BSCES meetings/ seminars or being sponsors of the BSCES Newsletter.
- Supporting and encouraging technical and professional growth.
- Encouraging engineers to prepare articles for publication in the BSCES Newsletter or ASCE and BSCES professional and technical journals.
- Assisting in the payment of ASCE and BSCES dues.

Members who want their organization to be considered for recognition should fill out the attached nomination form which describes their organization's level of support to ASCE and BSCES. The awards committee will review the nominations and select an exemplary small employer and a large employer in the Section. Organizations with less than 50 employees are eligible for the Small Employer Award. Awards will be presented at the 168th BSCES Annual Awards Dinner in the fall. Successful recipients will be considered for endorsement as potential (future) applicants for the ASCE Employer Recognition Award. No organization will be eligible to receive the award in consecutive years.

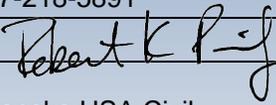

NAME OF EMPLOYER: Skanska USA Civil

Complete and return this nomination form and attachment to the BSCES Awards Committee no later than Monday, May 15, 2017 to be eligible for the award.

Nominator/Title: Rob Pine / Operations Executive

Address: 1365 Main Street Waltham, MA 02451

Telephone: 617-218-5891 Email: robert.pine@skanska.com

Signature:  Date: 5/24/17

Employer: Skanska USA Civil

Contact Person: Rob Pine

Title: Operations Executive

Office Address: 1365 Main Street Waltham, MA 02451 Website: skanska.com

Telephone: 617-218-5891 Email: robert.pine@skanska.com

Please answer the following questions:

How many employees do you have? 58 (boston civil)

How many are civil engineers? 46

How many civil engineers are members of ASCE? BSCES? 6 | 6

How many times in the last year have you provided sponsorship of BSCES meetings/seminars or sponsorship of the BSCES Newsletter? 2

For questions contact BSCES Awards Committee Chair Christopher Smith at 617/532-2223 or crsmith@hntb.com.

Thank you for your continued support of ASCE and BSCES.

SKANSKA

In response to the request to describe specific activities or policies which demonstrate the organizations support for involvement in organizations like ASCE and BSCE, we felt the best way to answer this question was utilizing excerpts from Skanska’s Code of Conduct.

Skanska believes with dedicated colleagues who share our strong values make us a great company – and this is essential when it comes to attracting employees and being chosen by customers for their projects. It builds trust among colleagues, partners and customers. It also builds pride and strengthens our business and company. Our business and reputation are strong and we continue to build our culture, as manifested in our Code of Conduct. With a world-leading position comes increased responsibility.

**“Living our values builds trust among colleagues, partners and customers.
It builds pride and strengthens our business.”**

**Johan Karlström
President and CEO**

We would like to reference 3 specific sections of the code of conduct that allow and encourage Skanska employees to participate in organizations like ASCE and BSCE.

Skanska Values

Our Code is based on our values, which are a set of beliefs that govern our actions. Our values commit us to acting with the highest levels of ethics, and to conduct business in a responsible and sustainable way. Everything we do should reflect our values:

One of our values is be better together. This is defined in our code as

“We always strive to be better in all we do. We are a learning organization and generously share our expertise. We take pride in quality and innovation. We build One Skanska teams together with customers, partners and communities. We leverage diversity to deliver the best solutions. We foster inclusive cultures where we are open and fair, showing trust and respect for each other.”

Our Commitment at our Workplace

Personal Growth and Development - principles

- We believe our people are our greatest asset.
- We support our employees in growing and developing both personally and professionally.
- We offer training and development opportunities to improve our employees' knowledge and skillsets.
- We encourage our employees to develop and learn through networking and sharing of best practices.

Our commitment in the marketplace

Relationships with stakeholders - principles

- We are committed to positive, constructive and long-term business relationships with organizations that have values aligned with our own.
- We believe stakeholders conducting business with Skanska are entitled to the same level of conduct and ethical behavior that we expect from them.
- We do not compromise our values for any stakeholder.

Skanska believes firmly that its greatest asset is its people and accordingly affords its employees opportunities to develop and grow professionally, improve the communities in which we work and raise the bar on how we conduct ourselves. Skanska builds what matters by building better together. Our values align with ASCE's values of and by allowing our employees to participate in ASCE and BSCE we are allowing them to grow professionally as well as improving our industry and society in alignment with both organizations values.

In summary, Skanska supports paying the costs for any of our employees to attend BSCE events, grants them time off in order to attend, and pays the dues for individuals who join ASCE/BSCE and take an active role in the organization. We also encourage our employees to become technical group leaders and to help organize meetings for the various groups. This support has been proven by Skanska employees' involvement in BSCE during 2016. Thank you for considering Skanska for this Employee Recognition Award.

2017 Employer Recognition Awards

The Boston Society of Civil Engineers Section of the American Society of Civil Engineers Awards Committee invites you to nominate an organization to receive the Small Employer Recognition Award or the Large Employer Recognition Award.
