

2021 Sustainability in Civil Engineering Awards

Submission Information

Purpose

The purpose of the Sustainability in Civil Engineering Award is to recognize Massachusetts civil engineering infrastructure projects that embody the principles of sustainability espoused by the Committee, ASCE, and the Institute for Sustainable Infrastructure (ISI). Such projects prominently and creatively consider the five sustainability indicators of quality of life, leadership, resource allocation, natural world, and climate risk.

The BSCES Committee on Sustainability will receive entries, judge the entries, and select the winning project. The award will be issued to the project owner.

Eligibility

To be eligible, a project must demonstrate adherence to the principles of economic, social and environmental sustainability as identified by ASCE/ ISI criteria for sustainable infrastructure. Awards will be offered in the following categories differentiating project scale:

- 1. small, ≤ \$10M capital cost or
- 2. large > \$10M capital cost

The project must have been designed by a team of civil engineers based in Massachusetts and must have been constructed within the last five years.

Rules for Submission

- 1. Entries for the award must include the completed Entry Form that follows below.
- 2. The entry deadline is February 22, 2021. The winner will be announced at the BSCES Annual Awards Event in 2021. Entries may be submitted electronically to bsces@engineers.org.
- 3. The BSCES Committee on Sustainability reserves the right to request additional information for any or all entries.

Evaluation Criteria

Primary consideration will be given to the extent to which innovative design or construction methods that have been applied are consistent with economic, social and environmental sustainability criteria described in the Envision Sustainable Infrastructure Framework;

A printout of the Envision™ project assessment scoring table from the ISI website completed by an Envision Sustainable Professional (ENV SP) is recommended as an attachment to the nomination form. The Envision project assessment report, if provided, will better inform the panel of judges about the sustainability benefits of the project. The BSCES Committee on Sustainability will receive the nominations and forward entries which meet the rules for submission to a separate judging panel. The judging panel will consist of 2-3 independent and qualified reviewers who have no apparent conflicting interest in the selection of a winner. The basis of award by the panel is to select the project in each size category which exemplifies achievement in the primary criteria identified. The Committee on Sustainability will submit the selected project winners to the Awards Committee to be included in the annual BSCES awards dinner ceremony.

The ENV sustainability professional (ENV SP) listed in the project information form above shall complete a sustainability scoring of the project using the ISI Envision Rating tool available through the ISI website. An official independent review or verification by ISI is not required; however, a completed tabular summary of all the Envision credits is to be submitted as part of this application.

Project Merits

Please provide a brief overview of the project, including schedule/timeline, total capital cost, how the project was developed/ planned, and list of major stakeholders engaged	

Please attach a formatted project summary document which describes the extent to which the project's innovative design exemplifies the economic, social, and environmental principles of sustainability as described by the Institute for Sustainable Infrastructure. The description should provide sufficient detail to support each Envision credit claimed. Also describe how the project approach and/or methods can be applied to support future developments in sustainability. (Approximately 2 to 3 pages total should be sufficient.) Attach additional project references, drawings, photographs, etc. as supplemental information.
