Protecting Buried Pipelines and Sewers During Construction

Steven J. DelloRusso, PE

Senior Consulting Engineer, Simpson Gumpertz & Heger Inc.

Daniel P. Valentine, Esq., PE

Senior Project Manager, Simpson Gumpertz & Heger Inc.

Wednesday, October 19, 2022

Zoom Webinar

12:00 PM – 1:00 PM

Construction projects are everywhere. Many times, especially for larger projects, the proposed construction occurs near (or on top of) existing buried infrastructure, such as water or sewer mains, storm drain piping, or utility vaults. In this webinar, we will present examples of the loads imposed on existing buried infrastructure by new construction and construction activities, discuss various methods for determining how surface loads are transmitted through the soil and into buried structures, and share potential approaches to reduce the effect of such loads on the structures. The webinar will conclude with examples showing how to calculate loads for specific situations.

Registration Deadline: Monday, October 17, 2022

\$45 Members, \$55 Non-Members

\$40 Public Sector Members, \$45 Public Sector Non-Members

\$15 Senior Members (65+), Students

Information/Registration:

Register to attend this meeting and pay by credit card online [here](#). To register online for an event at the BSCES member rate you must login using your BSCES assigned username and password. If you do not know your BSCES member login information call 617/227-5551. You can also register for this event by mail or email. To do so, download and complete a [BSCES Event Registration Form](#) and follow the submission instructions. Cancellations received after Monday, October 17, 2022 and no-shows will be billed.

This presentation provides 1 Professional Development Hour (PDH)
