

Erosion Prevention & Sediment Control Training

Purpose: This training has been designed for MassDOT construction staff, environmental monitors, project designers, wetland scientists, design engineers and contractors to improve environmental stewardship on Highway Division projects through design, selection and implementation of stormwater Best Management Practices. Environmental stewardship is the responsibility of all whose actions affect the environment.

This training program has been designed for small and large size projects and is not necessarily specific to large scale highway or bridge projects. The techniques, options and approaches towards sediment control and erosion prevention and general permit compliance can be universally applied to all projects, regardless of its size.

Trainers:

- Michael D. Howard, Principal, Epsilon Associates, Inc.
- Ingeborg E. Hegemann, Principal, BSC Group, Inc.
- Dennis Lowry, Associate VP, Ecologist, AECOM
- Matthew Mullally, PE, Project Manager, AECOM
