Good morning all,

I am seeking to gauge consistency amongst state licensing boards on their treatment of [SUE](#). I have a colleague at NSPS who is trying to better understand if any boards have a definitive standing on subsurface utility engineering.

To that end, I have a series of questions on the topic:

- Is SUE the practice of engineering in your state?
- Is SUE the practice of surveying in your state?
- Is SUE both surveying and engineering in your state?
- Is SUE neither engineering or surveying in your state?
- Has your board ever taken a position on SUE issues?

Any help is appreciated.

Thanks,

Josh Twitty
