Snapshot: 2021 Startups & Their Centers

Startup Accelerator

Arrowhead Center of
New Mexico

PARTING STONE

Parting Stone helps people deal with their grief over the death of a loved one or pet by creating beautiful stones out of cremated remains that can be displayed in someone's home and split up between a family so everyone can have a piece of their loved one.

Federal Research Lab

Argonne National Lab

RenewCO₂ develops clean electrochemical processes that convert CO₂ into monomers and other organic chemicals. Different from traditional fossil-derived feedstocks, their process is carbon negative and has a positive environmental impact

2020 SBIR Winner

Dept of Energy

Enabling Technology-
Reducing Greenhouse Gas
Emissions and Energy
Demands in the Meat
Production Industry via Scaling
Advanced 3D Culture
Bioreactors

University Accelerator
